1. ABOUT THIS GUIDE

Objectives and target audience

This guide describes how to install and configure the Skrill Shopify module. It assumes that you have an existing Shopify installation.

Conventions used in this guide

The table below lists some of the conventions used in this guide.

Table 1-1: List of conventions

Convention	Description
Code example	Used to illustrate example code, functions, and commands.
File path	Used to indicate a file path or folder structure.
Glossary	Glossary term
Menu1 > Menu option2 >	Indicates a menu path.

2. INTRODUCTION

What is the Shopify module?

Shopify is an eCommerce platform, which provides online merchants with a shopping cart system.

Shopify has been integrated with Skrill's online payment solution called Quick Checkout. Installing and configuring the Skrill Payment Solution module provides a simple, secure, and convenient option for connecting to Skrill's online payment processing platform via Shopify.

Skrill customers using Shopify have access to a wide range of cards and alternative payment methods.

Signing up for a Skrill account

Before you can start accepting payments through Skrill, you need to open a free merchant account by completing the online application form [here](#).

Once your application has been approved you can configure your Skrill credentials in your Skrill merchant account and then copy them in your Shopify backend and start taking payments.

3. INSTALLING AND CONFIGURING SHOPIFY

Secret Word and API Password

It is mandatory to setup a secret word and API/MQI password for your Skrill merchant account before configuring the Skrill Shopify module. The secret word is used to authenticate the data sent back to your Shopify server after payment. You must obtain the IP address of your Shopify server to configure the API/MQI password. You can find this IP address by executing the following command from a command prompt:

```
ping <server domain name>
```

For example:

```
ping example.shopifyserver.com
```

Pinging example.shopifyserver.com [145.76.160.206] with 32 bytes of data:

Make a note of the set of numbers in the square brackets. This is the IP address. Now you have the IP address, you can setup the secret word and API/MQI password as follows:

1. Log in to your Skrill merchant account at www.skrill.com.
2. Go to **Settings >> Developer settings >> API / MQI / CVT Management (Figure 3-1)**.
3. Set API / MQI Password using the toggle, type and confirm by clicking **Save**.
4. For each section, specify the IP address(es) or IP address range of your Shopify server. This prevents payment or money transfer requests from other IP addresses if your secret word or API password is compromised. All requests from other IP addresses are denied. Access can be granted to:
 - A single IP address (e.g., 145.76.160.206 using the example above).
 - Multiple IP addresses, separated by space (e.g., 192.168.0.2 10.0.0.2).
 - A subnet in CIDR notation (e.g., 192.168.0.0/24).
5. Locate the Change API/MQI password section. Enter and confirm your API/MQI password.
6. Set Secret Word using the toggle and click **Save** to confirm.

Note: Your Secret Word must contain at least: 8 characters, 1 uppercase letter, 1 lowercase letter, and 1 number.

The screenshot displays the Skrill merchant dashboard. The top navigation bar includes 'Skrill', 'HELP', and 'Test Merchant'. The left sidebar lists various settings categories, with 'Developer Settings' highlighted. The main content area shows 'Developer Settings' for 'Payreto Demo Shop'. It includes a sub-section for 'API / MQI / GSR / CVT Management' with the following settings:

- Set API / MQI Password: Enabled
- Automated Payment Interface (API): Enabled - 8 IP's Whitelisted
- Merchant Query Interface (MQI): Enabled - 8 IP's Whitelisted
- Gateway Secure Restriction (GSR): Disabled
- Set Secret Word: Enabled

The screenshot displays the Skrill Developer Settings page. At the top, there are two shop profiles: Demo Shop 1 (ID: 58010731) and Demo Shop LTD (ID: 214816819). The main heading is "Developer Settings : Payreto Demo Shop". Below this, there are three tabs: "Wallet IP Whitelisting", "API / MQI / GSR / CVT Management" (which is active), and "API Documentation".

The "API / MQI / GSR / CVT Management" section contains five configuration blocks:

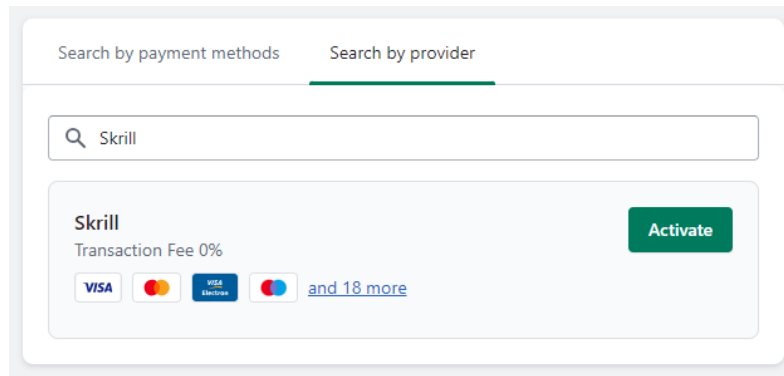

- Set API / MQI Password:** Enabled. A form with fields for "Current Password", "New Password", and "Confirm Password", and "Cancel" and "Save" buttons.
- Automated Payment Interface (API):** Enabled - 8 IP's Whitelisted. A form with an "Edit" button, an "Add" button, and a list of 8 IP addresses: 99.80.183.117, 99.81.135.32, 77.78.35.166, 182.253.163.41, 81.169.251.23, 91.208.28.7, 182.253.163.60, and 206.189.147.65.
- Merchant Query Interface (MQI):** Enabled - 8 IP's Whitelisted. A form with an "Edit" button, an "Add" button, and a list of 8 IP addresses: 99.80.183.117, 99.81.135.32, 77.78.35.166, 182.253.163.41, 81.169.251.23, 91.208.28.7, 182.253.163.60, and 206.189.147.65.
- Gateway Secure Restriction (GSR):** Disabled. A form with an "Edit" button, an "Add" button, and a single IP address field containing "0.0.0.0".
- Set Secret Word:** Enabled. A form with fields for "New Password" and "Confirm Password", and "Cancel" and "Save" buttons.

Figure 3-1: Configuring a Secret Word and API/MQI Password

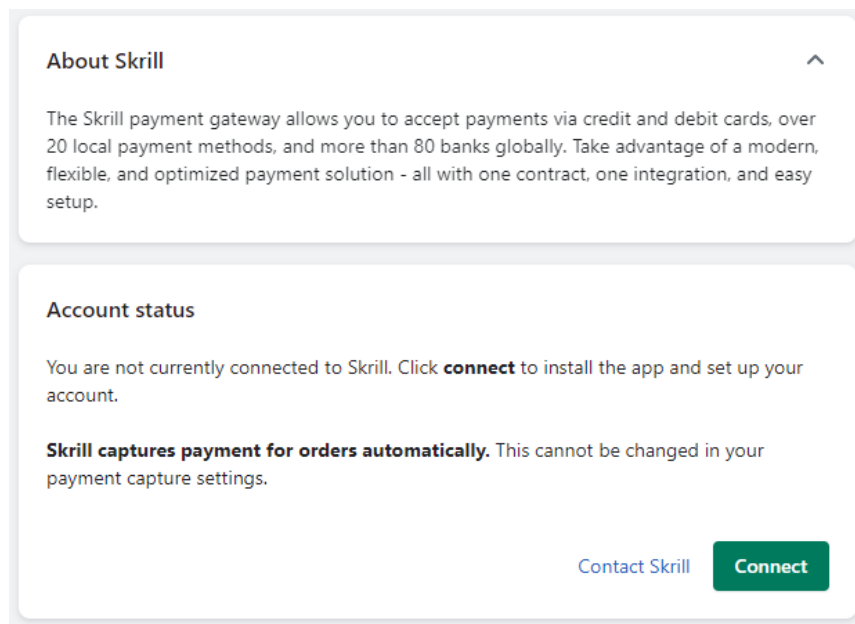

Activate Skrill in Shopify

1. Login to your Shopify admin account.
2. Choose **Settings** from bottom left.
3. Go to **Payments**.
4. Scroll down to **Add payment methods**.
5. Click on **Search by provider**.
6. Type **Skrill** in the search field.

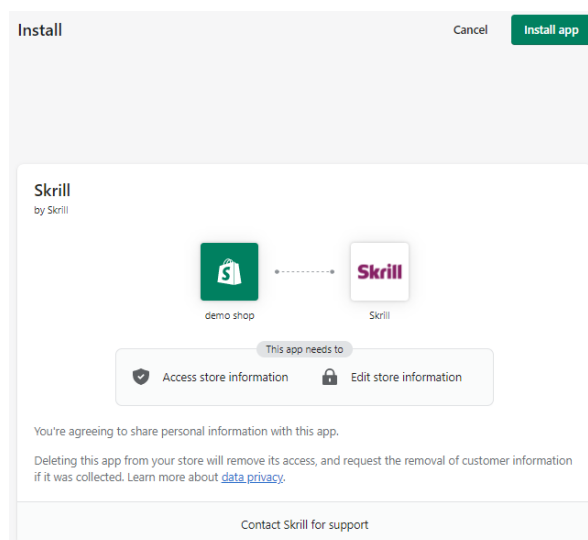

7. Click on **Skrill**, then click on **Activate** button.

8. Click on **Connect** button

9. Then press on **Install app**

10. Fill in the Merchant ID, Merchant Email (Email field), Secret word, API Password, Logo URL (this is optional) registered in your Skrill account (**Figure 3-1**).

Skrill Settings

Merchant ID
123456789
Your Skrill customer ID. It is displayed in the upper-right corner of your Skrill account.

Email
merchant@skrill.com
Your Skrill account email address.

Secret Word
.....
This feature is mandatory. To set it up, you need Settings.

API Password
.....
When enabled, this feature is required to log in.

Logo URL

The URL of the logo to be displayed via HTTPS, otherwise 50px wide and 50px high.

Test mode
Test your Skrill setup by simulating successful and failed transactions.

Enable test mode

Uninstall Skrill **Activate Skrill**

11. Click **Submit**
12. Enable/Disable the payment methods you would like to use e.g. VISA, Mastercard, Sofort, etc.
13. Click on **Activate Skrill** button.

4. CUSTOMER EXPERIENCE

This section describes the customer's checkout experience when using the Skriff Shopify module.

Note: We only describe the Checkout process from the payment selection step onwards as the previous steps are unchanged.

The steps are as follows:

1. Click Skriff.

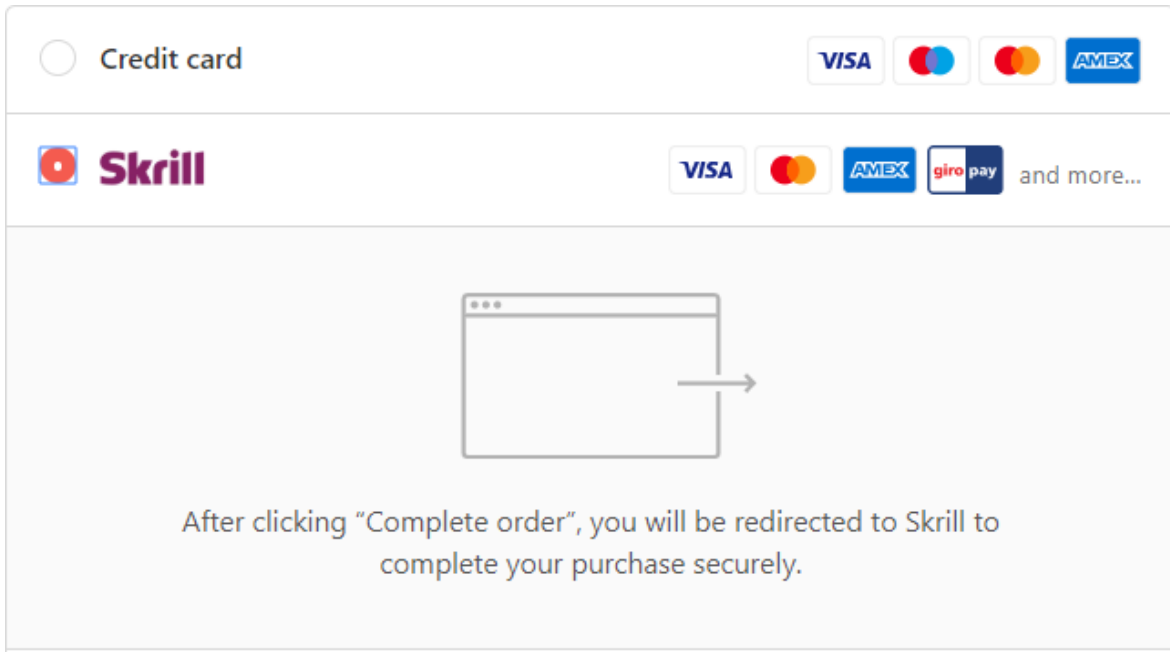

Figure 4-1: Shopify Checkout Payment selection showing different payment method

2. Enter Payment details in the Skrill Payment Form.
