1. About this guide

Objectives and target audience

This guide describes how to install and configure the Skril Payrex module. It assumes that you have an existing Payrex installation.

Conventions used in this guide

The table below lists some of the conventions used in this guide.

Table 1-1: List of conventions

Convention	Description
Code example	Used to illustrate example code, functions and commands.
<i>File path</i>	Used to indicate a file path or folder structure.
<u>Glossary</u>	Glossary term
Menu1 > Menu option2 >	Indicates a menu path.

2. Introduction

What is the Payrex module?

Payrex is an eCommerce platform, which provides online merchants with a flexible shopping cart system, as well as control over the look-and-feel, content and functionality of their online store.

Payrex has been fully integrated with Skrill's online payment solution called Quick Checkout. Installing and configuring the Skrill Payment Solution module provides a simple, secure and convenient option for connecting to Skrill's online payment processing platform via Payrex.

Skrill customers using Payrex have access to a wide range of card and alternative payment methods.

Signing up for a Skrill account

Before you can start accepting payments through Skrill, you need to open a free merchant account by completing the online application form [here](#).

Once your application has been approved you can configure your Skrill credentials in your Skrill merchant account and then copy them in the your Payrex backend and start taking payments.

3. Installing and configuring Payrexx

Secret Word and API Password

It is mandatory to setup a secret word and API/MQI password for your Skrill merchant account before configuring the Skrill Payrexx module. The secret word is used to authenticate the data sent back to your Payrexx server after payment. You must obtain the IP address of your Payrexx server to configure the API/MQI password. You can find this IP address by executing the following command from a command prompt:

```
ping <server domain name>
```

For example:

```
ping example.payrexxserver.com
```

```
Pinging example.payrexxserver.com [145.76.160.206] with 32 bytes of data:
```

Make a note of the set of numbers in the square brackets. This is the IP address. Now you have the IP address, you can setup the secret word and API/MQI password as follows:

1. Log in to your Skrill merchant account at www.skrill.com
2. Go to **Settings > Developer Settings (Figure 3-1)**
3. Check the **Enable service** checkboxes next to the API and MQI sections
4. For each section, specify the IP address(es) or IP address range of your Payrexx server. This prevents payment or money transfer requests from other IP addresses if your secret word or API password is compromised. All requests from other IP addresses are denied. Access can be granted to:
 - A single IP address (e.g. 145.76.160.206 using the example above)
 - Multiple IP addresses, separated by space (e.g. 192.168.0.2 10.0.0.2)
 - A subnet in CIDR notation (e.g. 192.168.0.0/24)
5. Locate the Change API/MQI password section. Enter and confirm your API/MQI password
6. Locate the Create secret word section. Enter and confirm your secret word
7. Click **Save** to save the changes
8. Logout of your account

The screenshot shows the 'Manage your settings' page with four tabs: ACCOUNT SETTINGS, BUSINESS INFO, LIMITS & VERIFICATION, and DEVELOPER SETTINGS. The 'DEVELOPER SETTINGS' tab is active, showing three sections:

- Automated Payment Interface (API):** Includes a checked 'Enable service' checkbox and a text input field for IP addresses containing '10.50.14.18'.
- Merchant Query Interface (MQI):** Includes a checked 'Enable service' checkbox and a text input field for IP addresses containing '10.50.14.18'.
- Change MQI/API password:** Includes a note that the password is required to access the API and MQI, and two password input fields labeled 'Password' and 'Re-type password', both containing '*****'. A 'Save' button is located at the bottom right of this section.

Below these sections is the **Create secret word** section, which includes a note that the Secret Word is used to sign gateway status reports and can be used instead of the API/MQI password. It features two input fields labeled 'Secret word' and 'Re-type secret word', both containing '*****', and a 'Save' button at the bottom right.

Figure 3-1: Configuring a Secret Word and API/MQI Password

Download Skrill on your Payrex backend

The next stage of the Payrex integration is to configure the Payrex module to connect to your Skrill account. The steps are as follows:

1. Login to your Payrex
2. Select **Settings**
3. Go to **Payment Providers**
4. Click on **Credit and Debit Cards**
5. Select **Skrill (Figure 3-2)**

The screenshot shows the 'Production account settings' page for Skrill. It contains three input fields with example values:

- Merchant email EUR:** maxim.zimin@payrex.com
- API/MQI Key EUR:** payrex1212
- Secret Word/Signature EUR:** payrex12

At the bottom left, there are three buttons: 'Back', 'Save', and 'Deactivate'. Red arrows point to the 'Save' button and the three input fields.

Figure 3-2: Skrill Settings with example values in Payrex backend

Configure Skrill Settings

Configure the Skrill Settings as follows:

1. Enter your Skrill Merchant account email address
2. Enter the API password and Secret word that you set up in the previous section

Table 3-1: Skrill Settings

Field Name	Description	Format/ Example
Merchant Account (email)	The email address linked to your Skrill merchant account (created by you when you first signed up for a Skrill merchant account).	techpubs@skrill.com
API Password	The API password. This field is mandatory. It allows the Payrex server to receive payment information.	N/A
Secret word	Enter the secret word configured for your Skrill account here. This feature is mandatory and ensures the integrity of the data posted back to your Payrex servers.	N/A

4. Customer Experience

This section describes the customer's checkout experience when using the Skrill Payrexx module.

Note: We only describe the Checkout process from the payment selection step onwards as the previous steps are unchanged.

The steps are as follows:

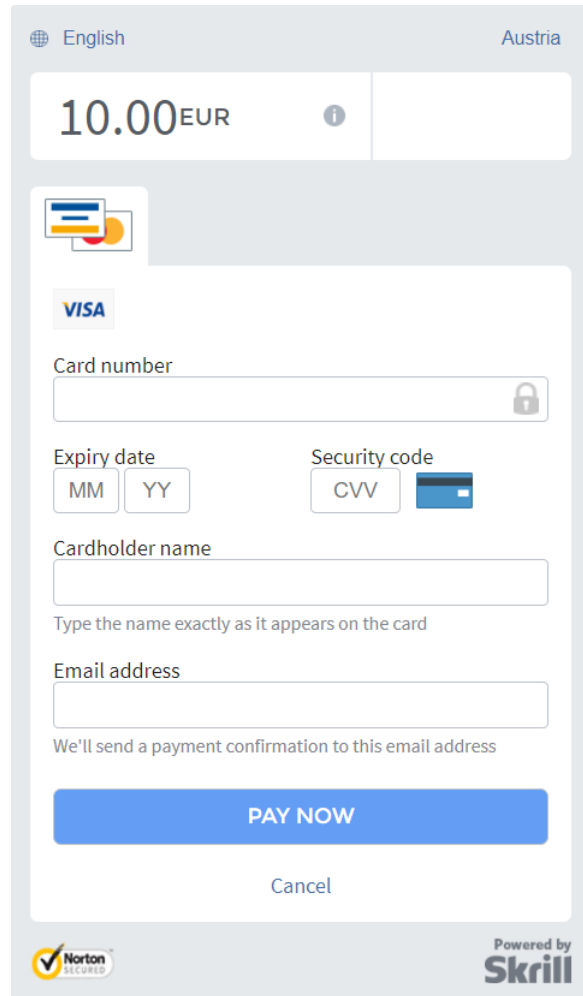

1. Click a payment method from the list of available payment methods (this list depends on the customer's country, the payment options configured for your Skrill account and the payment options configured in the Skrill Payrexx Module)

The screenshot shows a checkout page for an online payment system. At the top, it says "Online payment system" and "Paysafe Group". Below this, there is a form with the following fields:

- A text input field containing "T-shirt".
- A price field showing "10.00" and a currency dropdown menu set to "EUR".
- A "Contact details" section with a "Title" dropdown menu set to "Mr".
- Two text input fields for "First Name" (containing "Customer") and "Last Name" (containing "Last name").
- An "Email" field containing "test12@gmail.com" with an email icon on the right.
- A "Payment details" section with a row of payment method logos: VISA, Mastercard, Maestro, RAPID, Skrill, Klarna by Skrill, and Apple Pay.
- Below the logos, a text prompt says "Click on the button below to complete the payment with Skrill."
- A large purple button with a shopping cart icon and the text "Pay EUR 10.00".

Figure 4-1: Payrexx Checkout Payment selection showing different payment methods

2. Enter Payment details in the Skrill Payment Form

The image shows a mobile payment interface for Skrill. At the top, it displays the language as 'English' and the location as 'Austria'. The payment amount is set to '10.00 EUR'. Below this, there are icons for various payment methods, with 'VISA' selected. The form includes several input fields: 'Card number' (with a lock icon), 'Expiry date' (split into 'MM' and 'YY' boxes), 'Security code' (with a 'CVV' box and a card icon), 'Cardholder name', and 'Email address'. A note below the email field states, 'We'll send a payment confirmation to this email address'. At the bottom of the form, there is a prominent blue 'PAY NOW' button and a 'Cancel' link. The interface also features a 'Norton SECURED' logo and the text 'Powered by Skrill'.

Figure 4-2: Enter Payment Details in the Skrill Payment Form

3. Click **Pay Now** to complete the payment. If all is correct, the payment form will display the following screen:

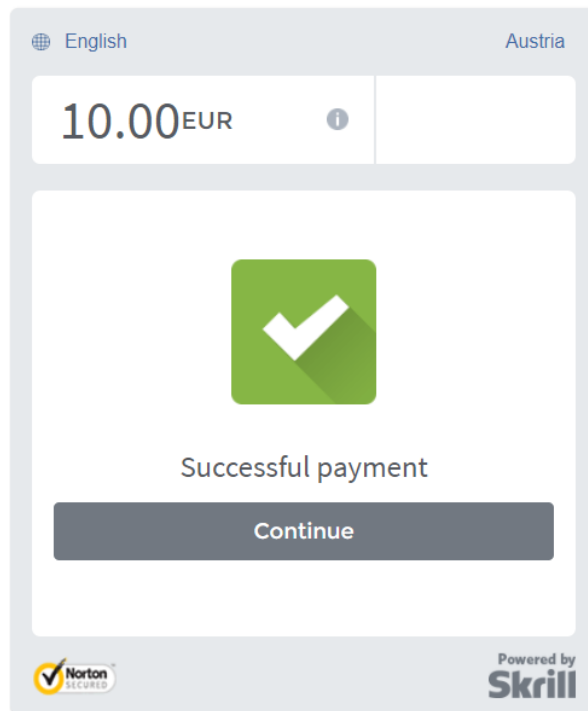

Figure 4-3: Successful Payment

4. Click **Continue** to return to the Payrex Order Confirmation screen. This screen contains the unique order number for this payment

Online payment system

Paysafe Group

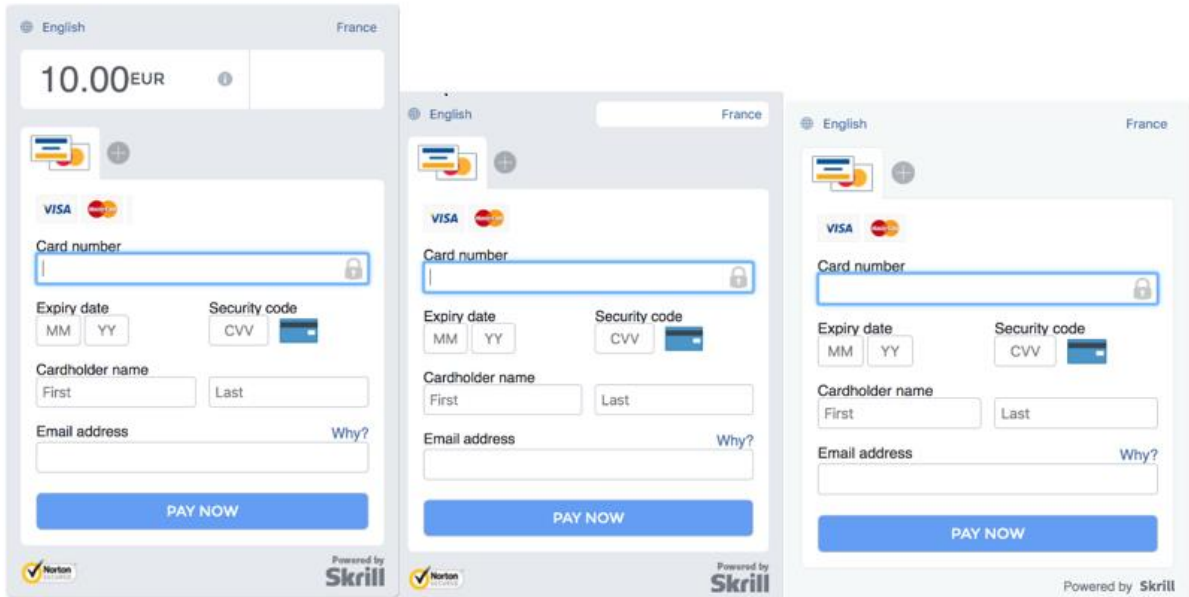

EUR 10.00

The payment has been processed.

Figure 4-4: Order Confirmation in Payrex Checkout

Removing or reducing the header and reducing the footer

You can request a version of the Skrill payment form without the Skrill header and amount fields. The security logo is also removed from the footer, to reduce its size. To enable this option, please contact Skrill Merchant Services and ask for the Reduced Header and Footer option. This option is shown in the screenshot below (The standard payment form is shown on the left and the reduced header and footer option on the right).

The image displays three side-by-side screenshots of the Skrill payment form, illustrating different configurations for the header and footer. All three forms are set to 'English' and 'France' and show a payment amount of '10.00 EUR'. The forms include fields for card number, expiry date (MM YY), security code (CVV), cardholder name (First and Last), and email address, along with a 'PAY NOW' button. The leftmost form is the standard version, featuring a prominent header with the amount and a footer with the Norton logo and 'Powered by Skrill' text. The middle form shows a reduced header and footer, with the amount field removed and the footer text minimized. The rightmost form shows the most reduced version, with the header and footer elements further minimized.

Figure 4-5: Reduced Header and Footer Option

5. Testing

We provide test cards shown in the table below for use with test merchant accounts. When using these card numbers enter an expiry date in the future and a random CVV number.

Table 5-1: Test Cards

Brand	Card Number
MasterCard	5438311234567890
Visa	4000001234567890

Should you wish to test Skrill in DEMO shops please get in touch with Skrill support at newbusiness@paysafe.com, so we can provide you with access.
