1. ABOUT THIS GUIDE

Objectives and target audience

This guide describes how to install and configure the Skriff Payrex module. It assumes that you have an existing Payrex installation.

Conventions used in this guide

The table below lists the conventions used in this guide.

Table 1-1: List of conventions

Convention	Description
Code example	Used to illustrate example code, functions and commands.
<i>File path</i>	Used to indicate a file path or folder structure.
Glossary	Glossary term
Menu1 > Menu option2 >	Indicates a menu path.

2. INTRODUCTION

What is the Payrex module?

Payrex is an eCommerce platform, which provides online merchants with a flexible shopping cart system, as well as control over the look-and-feel, content and functionality of their online store.

Payrex has been fully integrated with Skrill's online payment solution called Quick Checkout. Installing and configuring the Skrill Payment Solution module provides a simple, secure and convenient option for connecting to Skrill's online payment processing platform via Payrex.

Skrill customers using Payrex have access to a wide range of card and alternative payment methods.

Signing up for a Skrill account

Before you can start accepting payments through Skrill, you need to open a free merchant account by completing the online application form [here](#).

Once your application has been approved you can configure your Skrill credentials in your Skrill merchant account and then copy them in your Payrex backend and start taking payments.

3. INSTALLING AND CONFIGURING PAYREXX

Secret Word and API Password

It is mandatory to setup a secret word and API/MQI password for your Skrill merchant account before configuring the Skrill Payrex module. The secret word is used to authenticate the data sent back to your Payrex server after payment. You must obtain the IP address of your Payrex server to configure the API/MQI password. You can find this IP address by executing the following command from a command prompt:

```
ping <server domain name>
```

For example:

```
ping example.payrexserver.com
```

Pinging example.payrexserver.com [145.76.160.206] with 32 bytes of data:

Make a note of the set of numbers in the square brackets. This is the IP address. Now you have the IP address, you can setup the secret word and API/MQI password as follows:

1. Log in to your Skrill merchant account at www.skrill.com.
2. Go to **Settings >> Developer settings >> API / MQI / GSR / CVT Management (Figure 3-1)**.
3. Set API / MQI Password using the toggle and click **Save** to confirm.
4. For each section, specify the IP address(es) or IP address range of your Payrex server. This prevents payment or money transfer requests from other IP addresses if your secret word or API password is compromised. All requests from other IP addresses are denied. Access can be granted to:
 - A single IP address (e.g., 145.76.160.206 using the example above)
 - Multiple IP addresses, separated by space (e.g., 192.168.0.2 10.0.0.2)
 - A subnet in CIDR notation (e.g., 192.168.0.0/24)
5. Set Secret Word using the toggle and click **Save** to confirm.

Note: Your Secret Word must contain at least: 8 characters, 1 uppercase letter, 1 lowercase letter, and 1 number.

The screenshot displays the Skrill merchant account settings interface. The left sidebar contains navigation options like Home, Transfers, Banking, Balances, All Transactions, Settings, Account Settings, Developer Settings, Wallet Label Settings, Support, Notifications, and Merchant Information. The main content area is titled 'Developer Settings' and is for the 'CASINO-US' wallet. It shows a table of wallet IDs and their corresponding API/MQI/GSR/CVT Management settings. The settings are as follows:

Setting	Status	Whitelisted IP Count
Automated Payment Interface (API)	Enabled	3 IP's Whitelisted
Merchant Query Interface (MQI)	Enabled	3 IP's Whitelisted
Gateway Secure Restriction (GSR)	Enabled	5 IP's Whitelisted
Set API / MQI Password	Enabled	-
Set Secret Word	Enabled	-

The screenshot displays the Skrill Developer Settings interface. At the top, there are tabs for different wallet accounts: CASINO-US (ID: 309310256), BET965-BULGARIA (ID: 308760226), IBET420 (ID: 308760194), and BetOnline-Asia (ID: 306279907). The 'Developer Settings : CASINO-US' section is active, showing three sub-sections: 'Wallet IP Whitelisting', 'API / MQI / GSR / CVT Management', and 'API Documentation'. The 'API / MQI / GSR / CVT Management' section is expanded, revealing four configuration panels:

- Automated Payment Interface (API):** Enabled - 3 IP's Whitelisted. Includes a list of whitelisted IP addresses: 8.8.8.8, 9.9.9.9, and 11.12.31.12.
- Merchant Query Interface (MQI):** Enabled - 3 IP's Whitelisted. Includes a list of whitelisted IP addresses: 1.2.2.2, 5.6.3.2, and 12.1.2.3.
- Gateway Secure Restriction (GSR):** Enabled - 5 IP's Whitelisted. Includes a list of whitelisted IP addresses: 0.1.2.3, 10.152.252.185, 10.152.252.186, 3.5.4.3, and 1.2.3.5.
- Set API / MQI Password:** Enabled. Fields for Current Password, New Password, and Confirm Password.
- Set Secret Word:** Enabled. Fields for New Password and Confirm Password.

Figure 3-1: Configuring a Secret Word and API/MQI Password

Download Skrill on your Payrex backend

The next stage of the Payrex integration is to configure the Payrex module to connect to your Skrill account. The steps are as follows:

1. Login to your Payrex
2. Select **Settings**

3. Go to **Payment Providers**
4. Click **Credit and Debit Cards**
5. Select **Skrill** (Figure 3-2)

The screenshot shows the 'Production account settings' form for Skrill. It contains three input fields: 'Merchant email EUR' with the value 'maxim.zimin@payrexx.com', 'API/MQI Key EUR' with the value 'payrexx1212', and 'Secret Word/Signature EUR' with the value 'payrexx12'. Below the fields are three buttons: 'Back', 'Save', and 'Deactivate'. The 'Save' button is highlighted with a red box, and red arrows point to the 'Merchant email EUR' field, the 'API/MQI Key EUR' field, the 'Secret Word/Signature EUR' field, and the 'Save' button.

Figure 3-2: Skrill Settings with example values in Payrexx backend

Configure Skrill Settings

Configure the Skrill Settings as follows:

1. Enter the processing email of your Skrill Merchant account.
2. Enter the API password and Secret word that you set up in the previous section.

Table 3-1: Skrill Settings

Field Name	Description	Format/ Example
Merchant Account (processing email)	The processing email address linked to your Skrill merchant account (created by you when you first signed up for a Skrill merchant account).	techpubs@skrill.com
API Password	The API password. This field is mandatory. It allows the Payrex server to receive payment information.	N/A
Secret word	Enter the secret word configured for your Skrill account here. This feature is mandatory and ensures the integrity of the data posted back to your Payrex servers.	N/A

4. CUSTOMER EXPERIENCE

This section describes the customer's checkout experience when using the Skrill Payrex module.

Note: We only describe the Checkout process from the payment selection step onwards as the previous steps are unchanged.

The steps are as follows:

1. Click a payment method from the list of available payment methods (this list depends on the customer's country, the payment options configured for your Skrill account, and the payment options configured in the Skrill Payrex Module).

2. Enter Payment details in the Skrill Payment Form.

The image shows a mobile payment form for Germany. At the top right, there is a dropdown menu for 'Germany'. Below this, a grey box displays 'You pay 10.00 EUR' with an information icon. The main section is titled 'Pay with credit or debit card'. It contains a 'VISA' card number field with the number '4017 0423 6103 1490' and a lock icon. Below the card number is the text 'Card must be in your name'. There are two fields for 'Expiry date' (03/30) and 'CVV' (143), both with information icons. Below the CVV field is the text 'How to find your CVV number'. The 'Card holder name' field contains 'John Doe' with a note 'Type the name exactly as it appears on the card'. The 'Email' field contains 'john.doe@gmail.com' with a note 'We'll send a payment confirmation to this email address'. At the bottom, there is a checkbox for 'I confirm I wish to store these card details for subsequent payments.' and a large purple 'Pay' button with a lock icon. A 'Back' link is located at the very bottom.
