2. INTRODUCTION

What is the Shopify module?

Shopify is an eCommerce platform, which provides online merchants with a shopping cart system.

Shopify has been integrated with Skrill’s online payment solution called Quick Checkout. Installing and configuring the Skrill Payment Solution module provides a simple, secure, and convenient option for connecting to Skrill’s online payment processing platform via Shopify.

Skrill customers using Shopify have access to a wide range of card and alternative payment methods.

Signing up for a Skrill account

Before you can start accepting payments through Skrill, you need to open a free merchant account by completing the online application form here.

Once your application has been approved you can configure your Skrill credentials in your Skrill merchant account and then copy them in your Shopify backend and start taking payments.
3. INSTALLING AND CONFIGURING SHOPIFY

Secret Word and API Password
It is mandatory to setup a secret word and API/MQI password for your Skrill merchant account before configuring the Skrill Shopify module. The secret word is used to authenticate the data sent back to your Shopify server after payment. You must obtain the IP address of your Shopify server to configure the API/MQI password. You can find this IP address by executing the following command from a command prompt:

```
ping <server domain name>
```

For example:

```
ping example.shopifyserver.com
```

Pinging example.shopifyserver.com [145.76.160.206] with 32 bytes of data:

Make a note of the set of numbers in the square brackets. This is the IP address. Now you have the IP address, you can setup the secret word and API/MQI password as follows:

1. Log in to your Skrill merchant account at www.skrill.com.
2. Go to **Settings >> Developer settings >> API / MQI / GSR / CVT Management** *(Figure 3-1).*
3. Set API / MQI Password using the toggle, type and confirm by clicking **Save**.
4. For each section, specify the IP address(es) or IP address range of your Shopify server. This prevents payment or money transfer requests from other IP addresses if your secret word or API password is compromised. All requests from other IP addresses are denied. Access can be granted to:
   - A single IP address (e.g., 145.76.160.206 using the example above).
   - Multiple IP addresses, separated by space (e.g., 192.168.0.2 10.0.0.2).
   - A subnet in CIDR notation (e.g., 192.168.0.0/24).
5. Locate the Change API/MQI password section. Enter and confirm your API/MQI password.
6. Set Secret Word using the toggle and click **Save** to confirm.

**Note:** Your Secret Word must contain at least: 8 characters, 1 uppercase letter, 1 lowercase letter, and 1 number.
## Skrill Shopify Module Configuration Guide

### Developer Settings

<table>
<thead>
<tr>
<th>Setting</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Automated Payment Interface (API)</td>
<td>Enabled</td>
</tr>
<tr>
<td>Merchant Query Interface (MQI)</td>

Activate Skrill in Shopify

1. Login to your Shopify admin account.
2. Choose Settings from bottom left.
3. Go to Payments.
4. Scroll down to Alternative payment methods.
5. Click on Choose Alternative payment.
6. Type Skrill in the search field.
7. Click on Skrill.
8. Fill in the **processing email** and **the secret word** registered in your Skrill account (**Figure 3-2**).
9. Click on **Save**.

**Figure 3-2: Skrill Settings with example values in Shopify backend**
4. CUSTOMER EXPERIENCE

This section describes the customer’s checkout experience when using the Skrill Shopify module.

**Note:** We only describe the Checkout process from the payment selection step onwards as the previous steps are unchanged.

The steps are as follows:

1. Click Skrill.

---

Figure 4-1: Shopify Checkout Payment selection showing different payment methods
2. Enter Payment details in the Skrill Payment Form.

![Figure 4-2: Enter Payment Details in the Skrill Payment Form](image)

3. Click **Pay Now** to complete the payment. If all is correct, the payment form will display the following screen:

![Figure 4-3: Successful Payment](image)
5. TESTING

We provide two test cards shown in the table below for use with test merchant accounts. When using these card numbers enter an expiry date in the future and a random CVV number.

**Table 5-1: Test Cards**
