1. About this guide

Objectives and target audience

This guide describes how to install and configure the Skrill Shopware module. It assumes that you have an existing Shopware installation.

Conventions used in this guide

The table below lists some of the conventions used in this guide.

Table 1-1: List of conventions

Convention	Description
Code example	Used to illustrate example code, functions and commands.
<i>File path</i>	Used to indicate a file path or folder structure.
<u>Glossary</u>	Glossary term
Menu1 > Menu option2 >	Indicates a menu path.

2. Introduction

What is the Shopware module?

Shopware is an eCommerce platform, which provides online merchants with a flexible shopping cart system, as well as control over the look-and-feel, content and functionality of their online store.

Shopware has been fully integrated with Skrill's online payment solution called Quick Checkout. Installing and configuring the Skrill Payment Solution module provides a simple, secure and convenient option for connecting to Skrill's online payment processing platform via Shopware.

Skrill customers using Shopware have access to a wide range of card and alternative payment methods.

Signing up for a Skrill account

Before you can start accepting payments through Skrill, you need to open a free merchant account by completing the online application form [here](#).

Once your application has been approved you can configure your Skrill credentials in your Skrill merchant account and then copy them in the your Shopware backend and start taking payments.

3. Installing and configuring Shopware

Secret Word and API Password

It is mandatory to setup a secret word and API/MQI password for your Skrill merchant account before configuring the Skrill Shopware module. The secret word is used to authenticate the data sent back to your Shopware server after payment. You must obtain the IP address of your Shopware server to configure the API/MQI password. You can find this IP address by executing the following command from a command prompt:

```
ping <server domain name>
```

For example:

```
ping example.shopwareserver.com
```

```
Pinging example.shopwareserver.com [145.76.160.206] with 32 bytes of data:
```

Make a note of the set of numbers in the square brackets. This is the IP address. Now you have the IP address, you can setup the secret word and API/MQI password as follows:

1. Log in to your Skrill merchant account at www.skrill.com
2. Go to **Settings > Developer Settings (Figure 3-1)**
3. Check the **Enable service** checkboxes next to the API and MQI sections
4. For each section, specify the IP address(es) or IP address range of your Shopware server. This prevents payment or money transfer requests from other IP addresses if your secret word or API password is compromised. All requests from other IP addresses are denied. Access can be granted to:
 - A single IP address (e.g. 145.76.160.206 using the example above)
 - Multiple IP addresses, separated by space (e.g. 192.168.0.2 10.0.0.2)
 - A subnet in CIDR notation (e.g. 192.168.0.0/24)
5. Locate the Change API/MQI password section. Enter and confirm your API/MQI password
6. Locate the Create secret word section. Enter and confirm your secret word
7. Click **Save** to save the changes
8. Logout of your account

The screenshot displays the 'Manage your settings' page for a Skrill account. At the top, there are navigation tabs: 'Account Overview', 'All Transactions', 'Cards and Bank Accounts', and 'Skrill'. Below these, the 'Manage your settings' section is active, with sub-tabs for 'ACCOUNT SETTINGS', 'BUSINESS INFO', 'LIMITS & VERIFICATION', and 'DEVELOPER SETTINGS'. The 'DEVELOPER SETTINGS' tab is selected, showing three main sections:

- Automated Payment Interface (API):** Includes a checked 'Enable service' checkbox and a text input field for IP addresses containing '10.50.14.18'.
- Merchant Query Interface (MQI):** Includes a checked 'Enable service' checkbox and a text input field for IP addresses containing '10.50.14.18'.
- Change MQI/API password:** Includes a note that the password is required for API and MQI access, followed by two password input fields labeled 'Password' and 'Re-type password', both containing masked characters. A 'Save' button is located at the bottom right of this section.

Below these sections is the **Create secret word** section, which includes a note about the secret word's use, followed by two input fields labeled 'Secret word' and 'Re-type secret word', both containing masked characters. A 'Save' button is also present at the bottom right of this section.

Figure 3-1: Configuring a Secret Word and API/MQI Password

Download Skrill on your Shopware backend

The next stage of the Shopware integration is to configure the Shopware module to connect to your Skrill account. The steps are as follows:

1. Login to your Shopware admin account
2. Select **Modules and Services**
3. Click on **Configuration**
4. Go to **Plugin Manager**
5. Type **Skrill** in the search bar
6. Click on Skrill to configure your account (**Figure 3-2**)

The screenshot shows the configuration interface for the Skrill module in Shopware. The top navigation bar includes tabs for Configuration, Description, Plugin description, Change log, Comments, and Installation manual. The main content area is titled 'Shopware Description' and contains several configuration fields:

- Show in current shop: 1
- Payment status "Completely paid": 12
- Payment method: 1
- Merchant Email: (empty)
- Secret Word: (empty)
- Shop Logo URL: (empty)
- Hide Login: Inherited

A 'Save' button is located at the bottom right of the configuration area.

Figure 3-2: Skrill Settings with example values in Shopware backend

Configure Skrill Settings

Configure the Skrill Settings as follows:

1. Enter your Skrill Merchant account email address
2. Enter the Secret word that you set up in the previous section
3. Enter your website for which you would like to accept payment via Skrill

Table 3-1: Skrill Settings

Field Name	Description	Format/ Example
Merchant Account (email)	The email address linked to your Skrill merchant account (created by you when you first signed up for a Skrill merchant account).	techpubs@skrill.com
Shop URL	URL for the home page of your shop without the index.php e.g. if your shop is located at https://myshop.com/index.php you would enter https://myshop.com	https://myshop.com
Secret word	Enter the secret word configured for your Skrill account here. This feature is mandatory and ensures the integrity of the data posted back to your Shopware servers.	N/A

4. Customer Experience

This section describes the customer's checkout experience when using the Skrill Shopware module.

Note: We only describe the Checkout process from the payment selection step onwards as the previous steps are unchanged.

The steps are as follows:

1. Click a payment method from the list of available payment methods (this list depends on the customer's country, the payment options configured for your Skrill account and the payment options configured in the Skrill Shopware Module)

choose payment method

MAESTRO

MASTERCARD

VISA

Total:	191.90 € *
Shipping:	€ 0.00 *
Total:	€ 191.90
Total excluding VAT.:	€ 161.26
excl. 19% value-added tax.:	€ 30.64

2. Enter Payment details in the Skrill Payment Form

The image shows a mobile payment interface for Skrill. At the top, it displays the language 'English' and the location 'Germany'. Below this, the amount '179.95 EUR' is shown next to an information icon, and the merchant name 'shopware Demoshop' is displayed. A row of payment methods includes the Skrill logo, a credit card icon, 'giropay', and 'RAPID'. The main form contains the following fields: 'Card number' with a lock icon, 'Expiry date' with 'MM' and 'YY' dropdowns, 'Security code' with a 'CWV' dropdown and a card icon, and 'Cardholder name' with a text input field. A note below the name field says 'Type the name exactly as it appears on the card'. At the bottom of the form are two buttons: a blue 'PAY NOW' button and a 'Cancel' link. The footer includes the Norton Secured logo and the text 'Powered by Skrill'.

Figure 4-2: Enter Payment Details in the Skrill Payment Form

3. Click **Pay Now** to complete the payment. If all is correct, the payment form will display the following screen:

Figure 4-3: Successful Payment

4. Click **Continue** to return to the Shopware Order Confirmation screen. This screen contains the unique order number for this payment.

Thank you for your order at shopware Demoshop!

We have emailed you an order confirmation.
We recommend printing out the order confirmation listed below.

Figure 4-4: Order Confirmation in Shopware Checkout

Removing or reducing the header and reducing the footer

You can request a version of the Skrill payment form without the Skrill header and amount fields. The security logo is also removed from the footer, to reduce its size. To enable this option, please contact Skrill Merchant Services and ask for the Reduced Header and Footer option. This option is shown in the screenshot below (The standard payment form is shown on the left and the reduced header and footer option on the right).

The image displays three side-by-side screenshots of the Skrill payment form, illustrating different configurations for the header and footer. All three forms are set to 'English' and 'France' and show a payment amount of '10.00 EUR'. The forms include fields for card number, expiry date (MM YY), security code (CVV), cardholder name (First and Last), and email address, along with a 'PAY NOW' button. The leftmost form is the standard version, featuring a prominent header with the amount and a footer with the Skrill logo and 'Powered by Skrill' text. The middle form shows a reduced header with the amount field removed and a footer with the security logo removed. The rightmost form shows a further reduced header with the amount field removed and a footer with the security logo removed and the 'Powered by Skrill' text replaced by 'Powered by Skrill' in a smaller font.

Figure 4-5: Reduced Header and Footer Optio

5. Testing

We provide test cards shown in the table below for use with test merchant accounts. When using these card numbers enter an expiry date in the future and a random CVV number.

Table 5-1: Test Cards

Brand	Card Number
MasterCard	5438311234567890
Visa	4000001234567890

Should you wish to test Skrill in DEMO shops please get in touch with Skrill support at newbusiness@paysafe.com, so we can provide you with access.
