## 1. About this guide

---

### Objectives and target audience

This guide describes how to install and configure the Skrill WIX module. It assumes that you have an existing WIX installation.

### Conventions used in this guide

The table below lists some of the conventions used in this guide.

**Table 1-1: List of conventions**

Convention	Description
Code example	Used to illustrate example code, functions and commands.
<i>File path</i>	Used to indicate a file path or folder structure.
<u>Glossary</u>	Glossary term
<b>Menu1 &gt; Menu option2 &gt;</b>	Indicates a menu path.

## 2. Introduction

---

### **What is the WIX module?**

WIX is an eCommerce platform, which provides online merchants with a flexible shopping cart system, as well as control over the look-and-feel, content, and functionality of their online store.

WIX has been fully integrated with Skrill's online payment solution called Quick Checkout. Installing and configuring the Skrill Payment Solution module provides a simple, secure, and convenient option for connecting to Skrill's online payment processing platform via WIX.

Skrill customers using WIX have access to a wide range of card and alternative payment methods.

### **Signing up for a Skrill account**

Before you can start accepting payments through Skrill, you need to open a free merchant account by completing the online application form [here](#).

Once your application has been approved you can configure your Skrill credentials in your Skrill merchant account and then copy them in the your WIX backend and start taking payments.

---

## 3. Installing and configuring WIX

---

### Secret Word and API Password

It is mandatory to setup a secret word and API/MQI password for your Skrill merchant account before configuring the Skrill WIX module. The secret word is used to authenticate the data sent back to your WIX server after payment. You must obtain the IP address of your WIX server to configure the API/MQI password. You can find this IP address by executing the following command from a command prompt:

```
ping <server domain name>
```

For example:

```
ping example.wixserver.com
```

```
Pinging example.wixserver.com [145.76.160.206] with 32 bytes of data:
```

Make a note of the set of numbers in the square brackets. This is the IP address. Now you have the IP address, you can setup the secret word and API/MQI password as follows:

1. Log in to your Skrill merchant account at [www.skrill.com](http://www.skrill.com)
2. Go to **Settings > Developer Settings (Figure 3-1)**
3. Check the **Enable service** checkboxes next to the API and MQI sections
4. For each section, specify the IP address(es) or IP address range of your WIX server. This prevents payment or money transfer requests from other IP addresses if your secret word or API password is compromised. All requests from other IP addresses are denied. Access can be granted to:
  - A single IP address (e.g. 145.76.160.206 using the example above)
  - Multiple IP addresses, separated by space (e.g. 192.168.0.2 10.0.0.2)
  - A subnet in CIDR notation (e.g. 192.168.0.0/24)
5. Locate the Change API/MQI password section. Enter and confirm your API/MQI password
6. Locate the Create secret word section. Enter and confirm your secret word
7. Click **Save** to save the changes
8. Logout of your account

The screenshot displays the 'Manage your settings' section of a Skrill account interface. It features four tabs: 'ACCOUNT SETTINGS', 'BUSINESS INFO', 'LIMITS & VERIFICATION', and 'DEVELOPER SETTINGS'. The 'DEVELOPER SETTINGS' tab is active, showing three main sections:

- Automated Payment Interface (API):** Includes a checked 'Enable service' checkbox and a text input field for IP addresses containing '10.50.14.18'.
- Merchant Query Interface (MQI):** Includes a checked 'Enable service' checkbox and a text input field for IP addresses containing '10.50.14.18'.
- Change MQI/API password:** Includes a note that the password is required for API and MQI access, followed by 'Password' and 'Re-type password' text input fields, both containing masked characters.

Each section has a purple 'Save' button at the bottom right. Below these sections is a 'Create secret word' section with a note about its use for gateway status reports and email check interface requests, followed by 'Secret word' and 'Re-type secret word' text input fields, both containing masked characters, and another purple 'Save' button.

**Figure 3-1: Configuring a Secret Word and API/MQI Password**

### Download Skrill on your WIX backend

The next stage of the WIX integration is to configure the WIX module to connect to your Skrill account. The steps are as follows:

1. Login to your WIX admin account
2. Select **Settings**
3. Click on **Accept Payments**
4. Go to **Skrill – Manage Account**
5. Insert your Skrill credentials (**Figure 3-2**)

**Figure 3-2: Skrill Settings with example values in WIX backend**

### Configure Skrill Settings

Configure the Skrill Settings as follows:

1. Enter your Skrill Merchant account ID in the Merchant ID field. This is the Customer ID of your merchant account
2. Enter your Skrill Merchant account email address
3. Enter the API password and Secret word that you set up in the previous section

**Table 3-1: Skrill Settings**

<b>Field Name</b>	<b>Description</b>	<b>Format/ Example</b>
Merchant ID	Your unique merchant identifier. This is the Customer ID of your merchant account.	58010731
Merchant Account (email)	The email address linked to your Skrill merchant account (created by you when you first signed up for a Skrill merchant account).	techpubs@skrill.com
MQI/API Password	The API password. This field is mandatory. It allows the WIX server to receive payment information.	N/A
Secret word	Enter the secret word configured for your Skrill account here. This feature is mandatory and ensures the integrity of the data posted back to your WIXservers.	N/A

---

## 4. Customer Experience

---

This section describes the customer's checkout experience when using the Skrill WIX module.

---

**Note:** We only describe the Checkout process from the payment selection step onwards as the previous steps are unchanged.

---

The steps are as follows:

1. Click a payment method from the list of available payment methods (this list depends on the customer's country, the payment options configured for your Skrill account and the payment options configured in the Skrill WIX Module)

## 3 Payment

 Your payment and personal details are encrypted and secure.

<input checked="" type="radio"/> Skrill Digital Wallet	
<input type="radio"/> Skrill Credit Card	
<input type="radio"/> Paysafecard	
<input type="radio"/> Paysafecash	
<input type="radio"/> Rapid Transfer	

**Figure 4-1: WIX Checkout Payment selection showing different payment methods**

## 2. Enter Payment details in the Skrill Payment Form

English United Kingdom

20.00 EUR Skrill

Card number

Expiry date MM YY Security code CVV

Cardholder name

Type the name exactly as it appears on the card

This payment will be processed as a [Skrill Guest](#) payment and is subject to the [Skrill Privacy Policy](#).

PAY NOW

Cancel

Norton SECURED Powered by Skrill

**Figure 4-2: Enter Payment Details in the Skrill Payment Form**

3. Click **Pay Now** to complete the payment. If all is correct, the payment form will display the following screen:

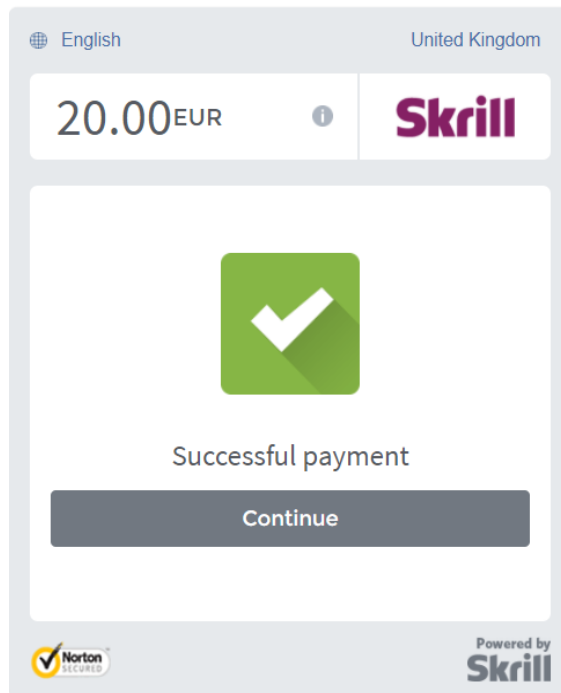

Figure 4-3: Successful Payment

4. Click **Continue** to return to the WIX Order Confirmation screen

*Thank you for your order, Customer Last name.*

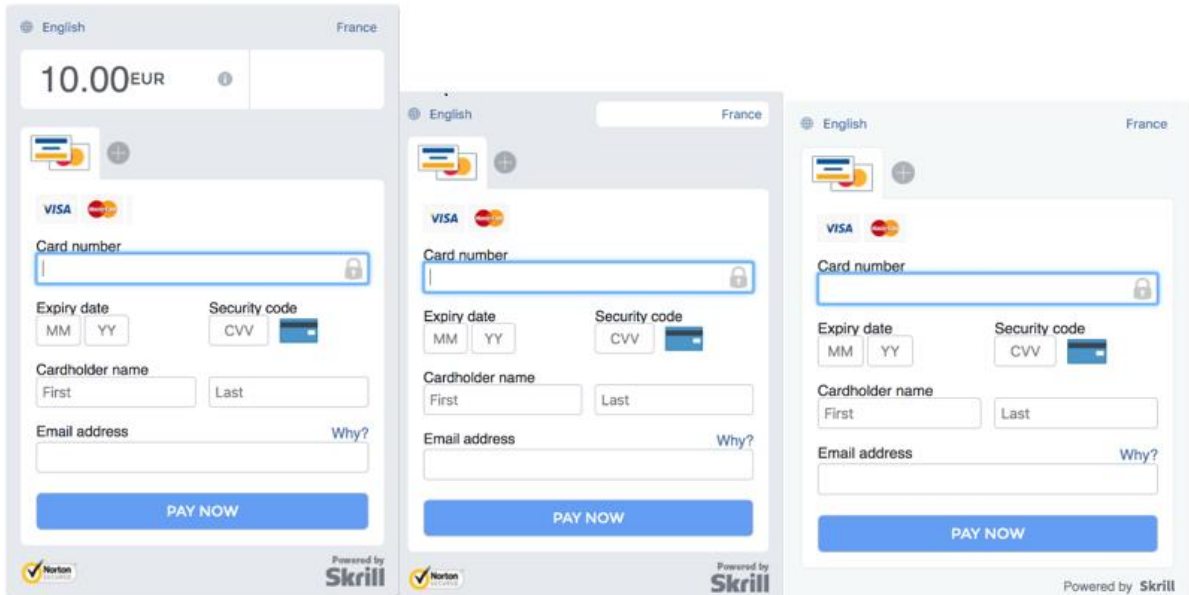

You'll receive an email confirmation soon.

<i>Total:</i>	€20.00

### Removing or reducing the header and reducing the footer

You can request a version of the Skrill payment form without the Skrill header and amount fields. The security logo is also removed from the footer, to reduce its size. To enable this option, please contact Skrill Merchant Services and ask for the Reduced Header and Footer option. This option is shown in the screenshot below (The standard payment form is shown on the left and the reduced header and footer option on the right).

The image displays three side-by-side screenshots of the Skrill payment form, illustrating different header and footer configurations. All three forms are set to 'English' and 'France' and show a payment amount of '10.00 EUR'. The leftmost form is the standard version, featuring a prominent header with the amount and a footer with the Skrill logo and 'Powered by Skrill' text. The middle form shows a reduced header with the amount field removed and a footer with a smaller security logo. The rightmost form shows a further reduced header with the amount field removed and a footer with the security logo removed entirely, leaving only the 'Powered by Skrill' text.

---

## 5. Refund Information

---

Currently refund is not supported in WIX. To complete refund, please login to your Skrill merchant account and follow the below steps:

1. Click on **All transactions**
2. Find the transaction which should be refunded
3. Click **refund** from right hand side column
4. Type the amount which should be refunded
5. Click **confirm return**

Once you have completed the refund in your Skrill account, please login to your WIX account to update transaction status manually (**Figure 5-1**)

Refunds with Skrill Aren't Supported

Refunds with this payment provider aren't currently supported. You'll need to complete this refund through Skrill. [Learn more](#)

## 6. Testing

---

We provide test cards shown in the table below for use with test merchant accounts. When using these card numbers enter an expiry date in the future and a random CVV number.

**Table 6-1: Test Cards**

Brand	Card Number
MasterCard	5438311234567890
Visa	4000001234567890

Should you wish to test Skrill in DEMO shops please get in touch with Skrill support at [newbusiness@paysafe.com](mailto:newbusiness@paysafe.com), so we can provide you with access.
