## 1. About this guide

---

### Objectives and target audience

This guide describes how to install and configure the Skrill ePages module. It assumes that you have an existing ePages installation.

### Conventions used in this guide

The table below lists some of the conventions used in this guide.

**Table 1-1: List of conventions**

Convention	Description
Code example	Used to illustrate example code, functions and commands.
<i>File path</i>	Used to indicate a file path or folder structure.
<u>Glossary</u>	Glossary term
<b>Menu1 &gt; Menu option2 &gt;</b>	Indicates a menu path.

## 2. Introduction

---

### **What is the ePages module?**

ePages is an eCommerce platform, which provides online merchants with a flexible shopping cart system, as well as control over the look-and-feel, content, and functionality of their online store.

ePages has been fully integrated with Skrill's online payment solution called Quick Checkout. Installing and configuring the Skrill Payment Solution module provides a simple, secure, and convenient option for connecting to Skrill's online payment processing platform via ePages.

Skrill customers using ePages have access to a wide range of card and alternative payment methods.

### **Signing up for a Skrill account**

Before you can start accepting payments through Skrill, you need to open a free merchant account by completing the online application form [here](#).

Once your application has been approved you can configure your Skrill credentials in your Skrill merchant account and then copy them in your ePages backend and start taking payments.

---

## 3. Installing and configuring ePages

---

### Secret Word and API Password

It is mandatory to setup a secret word and API/MQI password for your Skrill merchant account before configuring the Skrill ePages module. The secret word is used to authenticate the data sent back to your ePages server after payment. You must obtain the IP address of your ePages server to configure the API/MQI password. You can find this IP address by executing the following command from a command prompt:

```
ping <server domain name>
```

For example:

```
ping example.epagesserver.com
```

```
Pinging example.epagesserver.com [145.76.160.206] with 32 bytes of data:
```

Make a note of the set of numbers in the square brackets. This is the IP address. Now you have the IP address, you can setup the secret word and API/MQI password as follows:

1. Log in to your Skrill merchant account at [www.skrill.com](http://www.skrill.com)
2. Go to **Settings > Developer Settings (Figure 3-1)**
3. Check the **Enable service** checkboxes next to the API and MQI sections
4. For each section, specify the IP address(es) or IP address range of your ePages server. This prevents payment or money transfer requests from other IP addresses if your secret word or API password is compromised. All requests from other IP addresses are denied. Access can be granted to:
  - A single IP address (e.g. 145.76.160.206 using the example above)
  - Multiple IP addresses, separated by space (e.g. 192.168.0.2 10.0.0.2)
  - A subnet in CIDR notation (e.g. 192.168.0.0/24)
5. Locate the Change API/MQI password section. Enter and confirm your API/MQI password
6. Locate the Create secret word section. Enter and confirm your secret word
7. Click **Save** to save the changes
8. Logout of your account

The screenshot displays the 'Manage your settings' page for the Skrill ePages module. It features four tabs: 'ACCOUNT SETTINGS', 'BUSINESS INFO', 'LIMITS & VERIFICATION', and 'DEVELOPER SETTINGS'. The 'DEVELOPER SETTINGS' tab is active, showing three main sections:

- Automated Payment Interface (API):** Includes a checked 'Enable service' checkbox and a text input field containing '10.50.14.18' for allowed IP addresses.
- Merchant Query Interface (MQI):** Includes a checked 'Enable service' checkbox and a text input field containing '10.50.14.18' for allowed IP addresses.
- Change MQI/API password:** Includes a note that the password is required for API and MQI access, followed by 'Password' and 'Re-type password' input fields, both containing masked characters.

Below these sections is the 'Create secret word' section, which includes a note about the secret word's use for status reports and API/MQI requests, followed by 'Secret word' and 'Re-type secret word' input fields, both containing masked characters. Each section has a 'Save' button at the bottom right.

Figure 3-1: Configuring a Secret Word and API/MQI Password

### Download Skrill on your ePages backend

The next stage of the ePages integration is to configure the ePages module to connect to your Skrill account. The steps are as follows:

1. Login to your ePages admin account.
2. Select **Settings**
3. Click on **Payment**
4. Locate **Skrill**
5. Select **Add**
6. Fill in **Skrill Details**
7. Click on **Save** to configure Skrill (Figure 3-2)

To activate Skrill, after you have configured it for your shop, please follow the below steps:

1. Click on **Settings**
2. Select **Payment**
3. Scroll down to the bottom where all activated payment methods are visible
4. Click on Skrill and choose visibility from top left-hand side – **visible**

## Registration data for the Skrill account

## Configure Skrill Settings

Configure the Skrill Settings as follows:

1. Enter your Skrill Merchant account ID in the Merchant ID field. This is the Customer ID of your merchant account
2. Enter your Skrill Merchant account email address
3. Enter the Secret word that you set up in the previous section

**Table 3-1: Skrill Settings**

Field Name	Description	Format/ Example
Merchant ID	Your unique merchant identifier. This is the Customer ID of your merchant account.	58010731
Merchant Account (email)	The email address linked to your Skrill merchant account (created by you when you first signed up for a Skrill merchant account).	techpubs@skrill.com
Secret word	Enter the secret word configured for your Skrill account here. This feature is mandatory and ensures the integrity of the data posted back to your ePages servers.	N/A

---

## 4. Customer Experience

---

This section describes the customer's checkout experience when using the Skrill ePages module.

**Note:** We only describe the Checkout process from the payment selection step onwards as the previous steps are unchanged.

---

The steps are as follows:

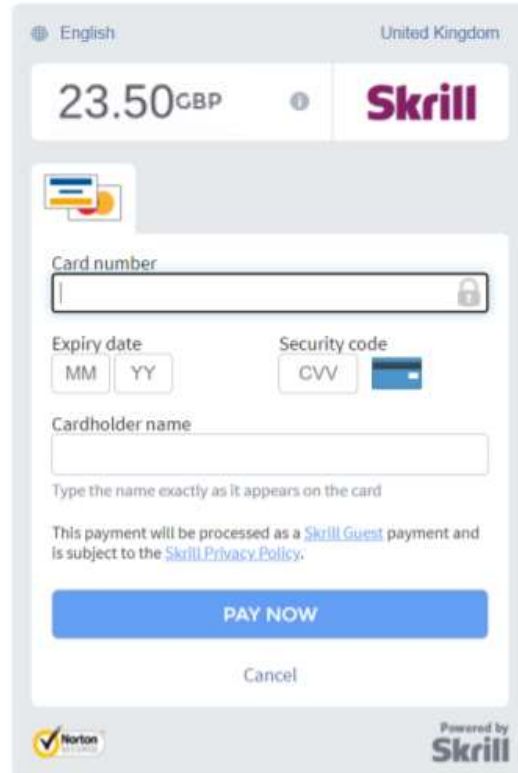

1. Click on Skrill, so the gateway can open up on the next step showing all payment methods available to the customer's country

The screenshot shows the checkout process for Shop Mustermann. The page title is "Shop Mustermann" with a "Back to basket" link. The navigation bar includes "Basket", "Address", "Delivery", "Payment" (active), "Check & Order", and "Payment with Skrill". The main heading is "Payment method". There are four radio button options: "Skrill - All Credit Cards" (selected), "Payment in advance", "Invoice", and "Cash on Delivery". The "Skrill" logo is visible next to the selected option. Below the "Cash on Delivery" option, a note states: "The payment-on-delivery charge is €4 and will be collected by the delivery service." On the right, a summary table shows: Subtotal (£16.44), Standard delivery (£7.06), and Total amount (£23.50 Incl. VAT). A "Next" button is at the bottom.

Subtotal	£16.44
Standard delivery	£7.06
<b>Total amount</b>	<b>£23.50</b>
	Incl. VAT

Figure 4-1: ePages Checkout Payment selection showing different payment methods

## 2. Enter Payment details in the Skrill Payment Form

The image shows a mobile payment interface for Skrill. At the top, it displays the language as 'English' and the location as 'United Kingdom'. Below this, the amount '23.50 GBP' is shown next to the Skrill logo. The main form area contains several input fields: a 'Card number' field with a lock icon, an 'Expiry date' field with 'MM' and 'YY' sub-fields, a 'Security code' field with 'CVV' and a card icon, and a 'Cardholder name' field. Below the name field, there is a note: 'Type the name exactly as it appears on the card' and 'This payment will be processed as a [Skrill Guest](#) payment and is subject to the [Skrill Privacy Policy](#).' At the bottom of the form, there is a blue 'PAY NOW' button and a 'Cancel' link. The footer includes the Norton logo and the text 'Powered by Skrill'.

Figure 4-2: Enter Payment Details in the Skrill Payment Form

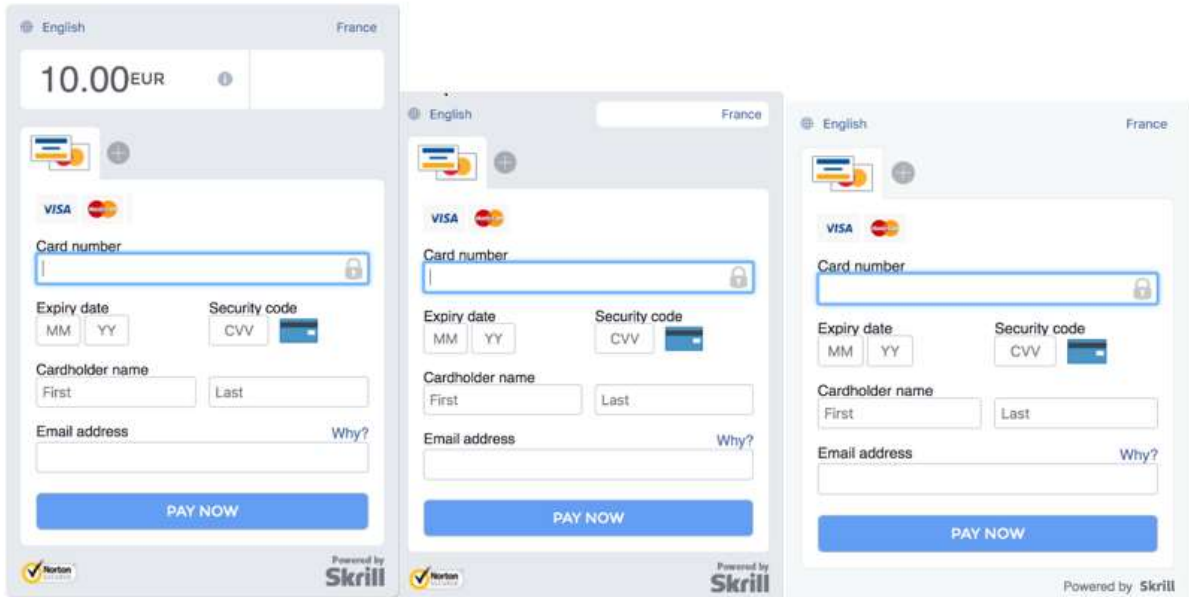

3. Click **Pay Now** to complete the payment. If all is correct, the payment form will display the following screen:

**Figure 4-3: Successful Payment**

### Removing or reducing the header and reducing the footer

You can request a version of the Skrill payment form without the Skrill header and amount fields. The security logo is also removed from the footer, to reduce its size. To enable this option, please contact Skrill Merchant Services and ask for the Reduced Header and Footer option. This option is shown in the screenshot below (The standard payment form is shown on the left and the reduced header and footer option on the right).

The image displays three side-by-side screenshots of the Skrill payment form, illustrating different configurations for the header and footer. All three forms are set to 'English' and 'France'.

- Left Screenshot (Standard):** Shows the full payment form with a header containing the amount '10.00 EUR' and a 'PAY NOW' button. The footer includes the Norton logo and the text 'Powered by Skrill'.
- Middle Screenshot (Reduced Header and Footer):** Shows the payment form with a reduced header (no amount) and a reduced footer (no Norton logo and 'Powered by Skrill' text).
- Right Screenshot (Reduced Header and Footer):** Shows the payment form with a reduced header (no amount) and a reduced footer (no Norton logo and 'Powered by Skrill' text).

---

## 5. Testing

---

We provide test cards shown in the table below for use with test merchant accounts. When using these card numbers enter an expiry date in the future and a random CVV number.

**Table 5-1: Test Cards**

Brand	Card Number
MasterCard	5438311234567890
Visa	4000001234567890

Should you wish to test Skrill in DEMO shops please get in touch with Skrill support at [newbusiness@paysafe.com](mailto:newbusiness@paysafe.com), so we can provide you with access.
